**DETAILED ACTION**  
**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Charles Eggers (858) 658-1639 on February 4, 2009.

Claims 13, 16 and 26 are cancelled.

Claims 1, 2, 6, 11, 12 and 25 are amended as follows;

1. (Currently amended) An apparatus for a wireless communication system supporting Large Area Synchronized-Code Division Multiple Access (LAS-CDMA) transmissions, the transmissions using LS codes for spread-spectrum modulation, the apparatus comprising:

means for determining a size of an interference free window (IFW);

means for determining a plurality of subsets of LS codes, each subset comprising a number of LS codes as a function of the IFW;

means for assigning a first of the plurality of subsets of LS codes to a first portion of the wireless communication system;

means for assigning a second of the plurality of subsets of LS codes to a second portion of the wireless communication system: ~~and~~

means for identifying mobile stations within the first portion of the wireless communication system with LS codes from the first of the plurality of subsets; and

means for identifying mobile stations within the second portion of the wireless communication system with LS codes from the second of the plurality of subsets.

2. (Currently amended) The apparatus of claim 1, wherein the means for determining the plurality of subsets of LS codes comprises:

means for determining a number of subsets of LS codes for assigning within the wireless communication system;

means for determining the first subset of LS codes having null cross-correlation with respect to each other; and means for determining the second subset of LS codes having null cross-correlation with respect to each other.

6. (currently amended) The apparatus of claim 5, wherein the ~~number~~ plurality of subsets of LS codes is at least three.

11. (currently amended) The apparatus of claim 1, wherein the first and second portions ~~of the system~~ correspond to first and second cells, respectively, in the wireless communication system.

12. (currently amended) The apparatus of claim 1, wherein the IFW is determined based on delay profiles of mobile stations in the first and second portions of the wireless communication system.

25. (currently amended) ~~A computer readable storage medium comprising computer executable instructions for~~ A computer readable storage medium encoded with computer executable instructions to be executed by a processor in a wireless communication system supporting Large Area Synchronized-Code Division Multiple Access (LAS-CDMA) transmissions for:

determining a size of an interference free window (IFW);

determining a plurality of subsets of LS codes, each subset comprising a number of LS codes as a function of the IFW;

assigning a first of the plurality of subsets of LS codes to a first portion of the wireless communication system;

assigning a second of the plurality of subsets of LS codes to a second portion of the wireless communication system; and

identifying mobile stations within the first portion of the wireless communication system with LS codes from the first of the plurality of subsets; and

identifying mobile stations within the second portion of the wireless communication system with LS codes from the second of the plurality of subsets.

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

Claims 1 and 25 are allowed.

The prior art fails to disclose means for assigning a first of the plurality of subsets of LS codes to a first portion of the wireless communication system;

means for assigning a second of the plurality of subsets of LS codes to a second portion of the wireless communication system: ~~and~~

means for identifying mobile stations within the first portion of the wireless communication system with LS codes from the first of the plurality of subsets; and

means for identifying mobile stations within the second portion of the wireless communication system with LS codes from the second of the plurality of subsets.

Further with regards to claim 25, Examiner has reviewed and interpreted the “computer readable storage medium” to be strictly one of the forms as disclosed by Applicants specification (Para 48 lines 11-13).

Claim 7 is allowed.

The prior art fails to disclose a cross-correlation between any two LS codes within a first subset that is null within an interference free window, and the cross-correlation between any two LS codes within a second subset is null within the interference free window and wherein the first and second subsets of LS codes are part of a set of LS codes and are defined by the interference free window, and wherein the set of LS codes comprises 128 LS codes, and the interference free window is equal to  $[-1, +1]$  and corresponds to 64 available LS codes for each of the first and second subsets.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
